

FIG. 1 is a perspective view of a prior art device, showing a base 10, a support 20, and a top 30. The base 10 is a rectangular plate with a small rectangular tab 11 on one side. The support 20 is a rectangular block with rounded corners, mounted on the base 10. The top 30 is a rectangular plate with rounded corners, mounted on the support 20. The top 30 has two curved, finger-like protrusions 31 and 32 on its front edge. A curved arrow 40 indicates the top 30 is pivotally mounted to the support 20.

PRIOR ART

FIG. 3 is a perspective view of a prior art device, showing a base 300, a top plate 310, and a central cavity 320. The device is shown in a perspective view, with the base 300 at the bottom, the top plate 310 at the top, and the central cavity 320 in the middle. The base 300 has a rectangular shape with rounded corners. The top plate 310 is a flat rectangular plate that fits into the base 300. The central cavity 320 is a rectangular opening in the top plate 310, which is surrounded by a raised rim 330. The rim 330 has a curved, flared shape. The device is shown in a perspective view, with the base 300 at the bottom, the top plate 310 at the top, and the central cavity 320 in the middle.
